Volume 136 November 1983

CONTENTS

Numerical experiments on Hele Shaw flow with a sharp interface. GRETAR TRYGGVASON and HASSAN AREF *page* 1

The effects of crossing trajectories on the dispersion of particles in a turbulent flow. M. W. WELLS and D. E. STOCK 31

Accurate computations for steep solitary waves. J. K. HUNTER and J.-M. VANDEN-BROECK 63

Nonlinear extreme ground effect on thin wings of arbitrary aspect ratio. E. O. TUCK 73

Trailing vortices in homogeneous and density-stratified media. TURGUT SARPKAYA 85

Turbulent dispersion from an elevated line source: measurements of wind-concentration moments and budgets. M. R. RAUPACH and B. J. LEGG 111

Combustion in plane steady compressible flow: general considerations and gasdynamical adjustment regions. J. F. CLARKE 139

The formation of an intermediate layer by horizontal convection in a two-layered shear flow. DAVID L. WILKINSON and IAN R. WOOD 167

Hydrodynamic dispersion in unsaturated porous media. P. G. DE GENNES 189

Stability characteristics for flows of the vortex-sheet type. Y. T. FUNG 201

Pattern selection for finite-amplitude convection states in boxes of porous media. PAUL H. STEEN 219

The dispersion of solute from time-dependent releases in parallel flow. N. G. BARTON 243

Forcing of convection due to time-dependent heating near threshold. M. C. CROSS, P. C. HOHENBERG and M. LÜCKE 269

Low-Reynolds-number flow past an elliptic cylinder. KAZUHITO SHINTANI, AKIRA UMEMURA and AKIRA TAKANO 277

A shear-flow instability in a circular geometry. M. RABAUD and Y. COUDER 291

An experimental study of entrainment and transport in the turbulent near wake of a circular cylinder. BRIAN CANTWELL and DONALD COLES 321

On critical flow around smooth circular cylinders. C. FARELL and J. BLESSMANN 375

Particle motion in Stokes flow near a plane fluid–fluid interface. Part 1. Slender body in a quiescent fluid. SEUNG-MAN YANG and L. GARY LEAL 393

Frame-independent kinetic theory. L. C. WOODS 423

Wave jumps and caustics in the propagation of finite-amplitude water waves. D. H. PEREGRINE 435

A parabolic equation for the combined refraction–diffraction of Stokes waves by mildly varying topography. JAMES T. KIRBY and ROBERT A. DALRYMPLE 453

REVIEWS

Finite Elements in Fluids, Vol. IV, edited by R. H. Gallagher, D. H. Norrie, J. T. Oden and O. C. Zienkewicz; Finite Element Flow Analysis, edited by T. Kawai 467
